Motivated junior front-end web developer with 3 years of college experience using HTML and CSS to develop websites, I also learn how to design wireframes for websites. Designed and developed a website to promote shoes, designed and developed a website to promote the company to prospective employees.

With the latest course that I made I had improve my HTML and CSS skills while I learned new skills such as Bootstrap, JavaScript and jQuery.

Currently developing a responsive website using HTML, CSS and Bootstrap to promote make-up services.

During the bootcamp I created projects using the skills that I learned each week. I made projects using HTML, CSS, JavaScript, jQuery, Bootstrap and Ajax.
